Introduction

Valentina Presutti
General Chair

WELCOME TO ESWC IN CRETE!
Καλώς ήρθατε στο ESWC στην Κρήτη

After the nice experience in Montpellier, we are back to the sunny Crete, where an exciting conference program is waiting for us!

The main scientific program of the conference comprises 50 paper presentations (41 research and 9 in-use) completed by demonstration and poster presentations. In addition, the conference program includes 13 workshops, 8 tutorials, as well as a PhD Symposium (with 11 paper presentations), the AI Mashup Challenge, the LinkedUp Challenge, the Semantic Web Evaluation Track (featuring 3 challenges), the EU Project Networking Session and a panel on “Data Protection and Security on the Web”. Last but not least, we will attend three inspiring and visionary keynote presentations.

This year edition can be described with the following keywords: visionary, advancing, pioneering, trendy.

Visionary, as we have three keynote speakers that bring three very different and inspiring views on the future of the Semantic Web. Steffen Staab (Universität Koblenz-Landau), advocating for the need of new programming paradigms for dealing with the nature

of the Semantic Web; Luciano Floridi (University of Oxford), who challenges our community with a vision of a Semantic Web as a means for predicting and manipulating autonomous choices; and Lise Getoor (University of Maryland), who shows us how optimization methods can support turning large-scale data into knowledge.

Advancing, as we have extended an already excellent scientific program with a new track named “Semantic Web Evaluation” (SemWebEval). The aim of this track is to provide a clear reference to the state of the art on specific Semantic Web tasks, and favor the spreading of proper empirical approaches for their future advancement. SemWebEval features three challenges, each of which rigorously defines a number of Semantic Web tasks and accompany them with their evaluation datasets and criteria. This year we have had a total of 10 tasks addressing three main topics: Semantic Publishing, Concept-Level Sentiment Analysis, and Linked Open Data-enabled Recommender Systems.

The description of tasks, datasets and evaluation criteria together with their best results will be published as part of a Semantic Web Journal special issue.

Pioneering, as we have decided to support workshops that address promising although yet not established topics such as “Semantic Web and Sentiment Analysis” and “Human-Semantic Web Interaction”; as well as emerging topics such as “Finance and Economics on the Semantic Web”, and “Semantic Publishing”. We have also introduced a unique official hashtag for each paper: you can find it within the papers or as a built-in feature of “ESWC Conference Live”: A mobile app which supports you in scheduling your conference attendance and performing your social interaction within the conference community. Do not forget to download it and provide your feedback!

Trendy, as we did not overlook to properly address the latest Tim Berners-Lee’s call for an internet users’ “bill of rights”. In fact, ESWC 2014 program includes a panel dedicated to “Data Protection and Security on the Web”.

As General Chair, I would like to thank everybody that has been involved in the organization of ESWC 2014. Most importantly, I would like to thank the PC Chairs Claudia d’Amato and Fabien Gandon for their excellent work in compiling a high quality and varied scientific program, and thanks to all Track Chairs and reviewers for their great work in supporting PC Chairs.

Special thanks go to PhD Symposium Chairs, Mathieu d’Aquin and Steffen Staab, who have realized an innovative format aimed at ensuring proper mentoring to our promising students. We have a great selection of workshops and tutorials thanks to the excellent work of our Workshop Chair Harald Sack and our Tutorial Chair Nathalie Aussenac-Gilles. Thanks to our EU Project Networking Session Chairs and to our great Keynote Speakers.

I would like to dedicate a special thank to Milan Stankovic and all Challenges Chairs, who have accepted and successfully achieved the organization of the new challenging “Semantic Web Evaluation” track. We are also very happy to host the AI Mashup challenge and the LinkedUp Challenge, which contribute bringing new ideas and exciting application demos.

Thanks to STI International for supporting the conference organization, to Ioan Toma (from STI) for taking care of the budget, and thanks also to our Local Organizer Irini Fundulaki. Youvivo GmbH deserves a special acknowledgement, in particular Martina Hartl, for the great professional support to the conference organization.

I am very grateful to Silvio Peroni, who has spread news about ESWC timely and effectively, to Serge Tymaniuk who has administered the web site, and to our Sponsor Chairs Axel Ngonga and Achim Rettinger for their precious help in collecting sponsorships for the conference.

I want to point out the remarkable job of the Proceedings Chair Anna Tordai and of the Semantic Technologies Coordinators: Luca Costabello, Maribel Acosta Deibe, Anna Lisa Gentile, Alessio Iabichella, and Andrea Giovanni Nuzzolese; who have developed our great “ESWC Conference Live” mobile app.

Thanks to our sponsors for their trust in ESWC.

May ESWC 2014 be inspiring for your future research!

ESWC2014 Sponsors and Supporters

Diamond Sponsor

PLANETDATA | The PlanetData project aims to establish a sustainable European community of researchers that supports organizations in exposing their data in new and useful ways. PlanetData pushes forward the state-of-the-art in large-scale data management and its application to the creation of useful, open data sets. This is motivated by the increasing reliance of business on large public data; the uptake of open data principles in many vertical sectors; and the need of research communities to make sense out of petabytes of scientific data, to describe and expose this data in ways that encourage and enable collaboration.

<http://planet-data.eu/>

Platinum Sponsors

BIG | Big Data is an emerging field where innovative technology offers alternatives to resolve the inherent problems that appear when working with huge amounts of data, providing new ways to reuse and extract value from information.

Big Data Public Private Forum (BIG) is working towards the definition and implementation of a clear strategy that tackles the necessary efforts in terms of research and innovation, while also it provides a major boost for technology adoption and supporting actions for the successful implementation of the Big Data economy.

Building an industrial community around Big Data in Europe is the priority of this project, together with setting up the necessary collaboration and dissemination infrastructure to link technology suppliers, integrators and leading user organizations.

<http://big-project.eu/>

Platinum Sponsors

LINKEDUP | The LinkedUp project <<http://linkedup-project.eu/>> is a FP7 Support Action which pushes forward the exploitation and adoption of public, open data available on the Web, in particular by educational organisations and institutions. To address these goals, LinkedUp provides a range of activities to support and promote innovative success stories which exploit large-scale Web data in educational scenarios as part of robust applications and tools. Activities include the organisation of the LinkedUp Challenge

(<http://www.linkedup-challenge.org>) and the development of evaluation techniques for comparing and assessing data-driven application and tools. Dataset collection, cataloging and publishing activities have resulted in the LinkedUp Data Catalog (<http://data.linkededucation.org/linkedup/catalog/>), a repository and catalog of well-described and assessed datasets for educational purposes. The LinkedUp Catalog supports participants of the data challenge, as well as interested data consumers and application developers in general. The overall aim is to facilitate the development of innovative applications produced by the LinkedUp community and challenge participants and their deployment in real-world use case scenarios. A collection of suitable use cases have been collected by the LinkedUp consortium and representatives of associated organisations, including representatives from renowned industrial, academic and higher education institutions such as Elsevier, the BBC, or the Commonwealth of Learning.. <http://linkedup-project.eu> <<http://linkedup-project.eu/>>

Gold Sponsors

ANNO MARKET | AnnoMarket.com is a new online marketplace for text analytics services, enabling anyone from large organisations to SMEs and individuals to buy and sell high-quality text processing services. The platform is entirely cloud-based and users pay for everything on a cost-effective, pay-as-you-go basis.

AnnoMarket provides a wide and growing selection of text analysis pipelines that you can use via simple REST APIs for either on-line or batch processing of documents.

Come and visit the stand to learn more and pick up a free credit voucher worth up to 10,000 API calls."

Gold Sponsors

LDBC | Non-relational data management is emerging as a critical need for the new data economy based on large, distributed, heterogeneous, and complexly structured data sets. This new data management paradigm also provides an opportunity for research results to impact young innovative companies working on new RDF and graph data management technologies to start playing a significant role in this new data economy. Standards and benchmarking are two of the most important factors for the development of new information technology, yet there is still no comprehensive suite of benchmarks and benchmarking practices for RDF and graph databases, nor is there an authority for setting benchmark definitions and auditing official results. Without them, the future development and uptake of these technologies is at risk by not providing industry with clear, user-driven targets for performance and functionality. The Linked Data Benchmark Council (LDBC) project is creating the first comprehensive suite of open, fair and vendor-neutral benchmarks for RDF/graph databases together with the LDBC foundation which will define processes for obtaining, auditing and publishing results. The core scientific innovation of LDBC is therefore to define meaningful benchmarks derived from a combination of actual usage scenarios combined with the technical insight of top database systems researchers and architects in the choke points of current technology. LDBC brings together a broad community of researchers and RDF and graph database vendors to establish an independent authority, the LDBC foundation, responsible for specifying benchmarks, benchmarking procedures and verifying/publishing results. The forum created will become a long-surviving, industry supported association similar to the TPC. Vendors and user organisations will participate in order to influence benchmark design and to make use of the obvious marketing opportunities.

<http://www.ldbc.eu/>

VIDEOLECTURES.NET | VideoLectures.NET is an award-winning free and open access educational video lectures repository. The lectures are given by distinguished scholars and scientists at the most important and prominent events like conferences, summer schools, workshops and science promotional events from many fields of Science. The portal is aimed at promoting science, exchanging ideas and fostering knowledge sharing by providing high quality didactic contents not only to the scientific community but also to the general public. All lectures, accompanying documents, information and links are systematically selected and classified through the editorial process taking into account also users' comments.

<http://videolectures.net/>

Gold Sponsors

LINKEDTV | As Television and the Web converge – television content is transmitted digitally, possibly over IP, to devices which are equally Web capable, while Web content includes audiovisual streams consumed over connected devices in the same manner as classical television – we note that the actual meaning of ‘television’ changes. On a connected device, (broadcast) television content, other audiovisual content and other Web content may be consumed in parallel or sequence, and the fact that something is ‘television’ or ‘Web’ blurs in the consumers’ awareness. Is YouTube playing on a SmartTV now television? Is a catchup TV stream on the laptop still television?

Linked Television is a vision of future television consumption. Here TV and Web content is seamlessly interlinked, for example while watching the news the viewer is getting background information on the stories at their fingertips; it’s seeing a painting in a TV program and being able to identify the artist and the museum where it hangs. It’s facilitating what the Second Screen generation is already doing, but now bringing this within the same digital ecosystem, so that content owners retain the connection with the viewer and control about the information being linked with their media.

<http://www.linkedtv.eu>

MEDIAMIXER | MediaMixer is an EU funded action to support organisations in enhancing their media contents to create greater value and extending reach across customers, consumers and the media value chain. MediaMixer promotes semantic multimedia fragment technologies which can be used by enterprises to fragment their media assets, annotate those fragments and use these annotations for more flexible media retrieval and re-use in new contexts.

PRELIDA | The PRELIDA project targets the particular stakeholders of the Linked Data community, including data providers, service providers, technology providers and end user communities. These stakeholders have not been traditionally targeted by the Digital Preservation community, and are typically not aware of the digital preservation solutions already available. Hence an important task of PRELIDA is to raise awareness of existing preservation solutions and to facilitate their uptake.

At the same time, the Linked Data cloud has specific characteristics in terms of structuring, interlinkage, dynamicity and distribution, that pose new challenges to the preservation community. PRELIDA organises in-depth discussions among the two communities to identify which of these characteristics require novel solutions, and to develop road maps for addressing the new challenges.

<http://www.prelida.eu/>

Bronze Sponsor

FLUID OPERATIONS | fluid Operations® (fluidOps) is an innovative software company headquartered in Walldorf, Germany. Its focus lies on the research and development of novel technologies for intelligent cloud and data management in the enterprise. With the Information Workbench®, fluidOps delivers a highly customizable platform for Linked Data and Big Data management and solution development. This includes support for the semantic integration of heterogeneous data sources across the borders of individual domains, collaborative knowledge acquisition and augmentation, semantic search, business intelligence and analytics, as well as data visualization and exploration. fluidOps' Conference Explorer app won the Linked Data-a-Thon at the ISWC 2011. <http://www.fluidops.com/>

.....

iSOCO | iSOCO, Intelligent Software Components S.A. (www.isoco.com) is a technology company founded in 1999, becoming the first company in Spain and one of the first in Europe to offer solutions based on Semantic Web technologies. Currently, iSOCO employs around 100 persons in offices in Barcelona, Madrid, Valencia, and Pamplona. iSOCO has ample experience in international R&D activities, especially in the different EU Frame Programmes, and is successful in transferring research results in the field of Semantic Web technologies to the market. To this purpose iSOCO Lab, the Research branch of the company, was created in 2001 with three main objectives: maintain the technological level of the company, foster innovation to approach the market through new products, and pave the way for the application of new technologies to business.

Student Grant | Best Paper Award | Best Demo Award

FORGE | The Future Internet Research and Experimentation (FIRE) facilities are a world class infrastructure supporting European research into new services and protocols associated with the next generation Internet. Open Educational Resources (OERs) have recently made headlines in the guise of MOOCs (Massive Open Online Courses) which are giving millions of students worldwide access to the highest quality education. The FORGE project will produce OERs supported by a combination of Linked Data technologies and rich multimedia interactive eBooks to turn FIRE into a learning resource. Specifically, in the future FORGE students will be able to setup and run large-scale Internet experiments on the FIRE facilities from within an eBook. Educators and students will be able to find and use course and experimental lab materials through our semantically marked up repository. See more at: <http://ict-forge.eu/>

Best Paper Award

Yahoo | Yahoo Labs is pioneering the new sciences underlying the Web. As the center of scientific excellence here at Yahoo, we deliver both fundamental and applied scientific leadership, publish research and create new technologies that power Yahoo's products. We're responsible for big inventions—and our goals are nothing short of inventing the future of the Internet and creating the next generation of businesses for Yahoo.

Video Recording

XLIKE | The goal of the XLike project is to develop technology to monitor and aggregate knowledge that is currently spread across mainstream and social media, and to enable cross-lingual services for publishers, media monitoring and business intelligence.

The aim is to combine scientific insights from several scientific areas to contribute in the area of cross-lingual text understanding. By combining modern computational linguistics, machine learning, text mining and semantic technologies we plan to deal with the following two key open research problems: to extract and integrate formal knowledge from multilingual texts with cross-lingual knowledge bases, and to adapt linguistic techniques and crowdsourcing to deal with irregularities in informal language used primarily in social media.

The developed technology will be language-agnostic, while within the project we will specifically address English, German, Spanish, Chinese and Hindi as major world languages and Catalan and Slovenian as minority languages.

www.xlike.org

XLIME | xLiMe is a research project (EU-FP7) dedicated to fusing the knowledge from different dimensions of media content. It proposes to extract knowledge from different media channels and languages and relate it to cross-lingual, cross-media knowledge bases. By doing this in near real-time we will provide a continuously updated and comprehensive view on knowledge diffusion across media, e.g., from European communities like Catalonia to worldwide content in English. By combining speech recognition, natural language processing, machine learning and semantic technologies we will advance key open research problems, by: 1. extracting machine-readable knowledge (entities, sentiment, events and opinions) from multilingual, multimedia and social media content and integrate it with cross-lingual, cross-media knowledge bases, 2. searching this knowledge with structured and unstructured queries in near real-time, 3. monitoring its provenance, consumption and diffusion and 4. analysing the interdependency between media exposure and behavioural patterns.

www.xlime.eu

Keynote Speakers

Steffen Staab,
Institute for Web Science and
Technologies - WeST, Universität
Koblenz-Landau, DE

Steffen studied in Erlangen (Germany), Philadelphia (USA) and Freiburg (Germany) computer science and computational linguistics. Afterwards he worked as researcher at Univ. Stuttgart/Fraunhofer and Univ. Karlsruhe, before he became professor in Koblenz. In his research career he has managed to avoid almost all good advice that he now gives to his team members. Such advice includes focusing on research (vs. company) or concentrating on only one or two research areas (vs. considering ontologies, semantic web, social web, data engineering, text mining, peer-to-peer, multimedia, HCI, services, software modelling and programming and some more). Though, actually, improving how we understand and use text and data is a good common denominator for a lot of Steffen's professional activities.

PROGRAMMING THE SEMANTIC WEB

The Semantic Web changes the way we deal with data, because assumptions about the nature of the data that we deal with differ substantially from the ones in established database approaches. Semantic Web data is (i) provided by different people in an ad-hoc manner, (ii) distributed, (iii) semi-structured, (iv) (more or less) typed, (v) supposed to be used serendipitously. In fact, these are highly relevant assumptions and challenges, because they are frequently encountered in all kind of data-centric challenges – also in cases where Semantic Web standards are not in use. However, they are only partially accounted for in existing programming approaches for Semantic Web data including (i) semantic search, (ii) graph programming, and (iii) traditional database programming approaches.

The main hypothesis of this talk is that we have not yet developed the right kind of programming paradigms to deal with the proper nature of Semantic Web data, because none of the mentioned approaches fully considers its characteristics. Thus, I want to outline empirical investigations of Semantic Web data and recent developments towards Semantic Web programming that target the reduction of the impedance mismatch between data engineering and programming approaches.

Prof Luciano Floridi,
Oxford Internet Institute,
University of Oxford, UK

Luciano Floridi is Professor of Philosophy and Ethics of Information at the University of Oxford, Senior Research Fellow at the Oxford Internet Institute, and Governing Body Fellow of St Cross College, Oxford. He is also Adjunct Professor, Department of Economics, American University, Washington D.C. Among his recognitions, he has been awarded the Cátedras de Excelencia Prize by the University Carlos III of Madrid (2014-15), was the UNESCO Chair in Information and Computer Ethics and Gauss Professor of the Academy of Sciences in Göttingen. He is a recipient of the APA's Barwise Prize, the IACAP's Covey Award, and the INSEIT's Weizenbaum Award. He is an AISB and BCS Fellow, Editor in Chief of Philosophy & Technology and of the Synthese Library. In 2012, he was Chairman of EU Commission's "Onlife Initiative". His most recent books are: *The Fourth Revolution - How the infosphere is reshaping human reality* (Oxford University Press, 2014), *The Ethics of Information* (Oxford University Press, 2013), *The Philosophy of Information* (Oxford University Press, 2011), *The Cambridge Handbook of Information and Computer Ethics* (editor, Cambridge University Press, 2010), and *Information: A Very Short Introduction* (Oxford University Press, 2010).

COORDINATION, SEMANTICS, AND AUTONOMY

The lecture is divided into four parts. In the first part, I offer a brief and simple introduction to four well-known senses in which different scientific fields speak of complexity, namely state complexity, Kolmogorov complexity, computational complexity, and programming complexity. I then suggest an intuitive way in which they can all be linked in a conceptual, unified view. Against this background, in the second part, I outline a new concept of complexity, which I shall call coordination complexity. This completes the unified view. I then argue, in the third part, that the semantic web helps us dealing with problems with increasingly high degree of coordination complexity, which require the mobilisation of whole systems to be tackled. In the last and concluding part, I highlight one of the consequences of the resolution of problems with high degree of coordination complexity: the predictability and manipulability of autonomous choices.

Lise Getoor,
University of Maryland, US

Lise Getoor is a Professor in the Computer Science Department at the University of California, Santa Cruz. Prior to that, she was a Professor in the Computer Science Department at the University of Maryland, College Park (2001-2013). Her primary research interests are in machine learning and reasoning with uncertainty, applied to graphs and semi-structured data. She also works in data integration, social network analysis and visual analytics. She has over 200 publications, eight best paper awards, an NSF Career Award, was PC co-chair for the 2011 International Machine Learning Conference (ICML), and is an Association for the Advancement of Artificial Intelligence (AAAI) Fellow. She received her Ph.D. from Stanford University in 2001, her M.S. from UC Berkeley, and her B.S. from UC Santa Barbara. Website: <http://www.cs.umd.edu/~getoor>

COMBINING STATISTICS AND SEMANTICS TO TURN DATA INTO KNOWLEDGE

Addressing inherent uncertainty and exploiting structure are fundamental to turning data into knowledge. Statistical relational learning (SRL) builds on principles from probability theory and statistics to address uncertainty while incorporating tools from logic to represent structure. In this talk I will overview our recent work on probabilistic soft logic (PSL), a SRL framework for collective, probabilistic reasoning in relational domains. PSL is able to reason holistically about both entity attributes and relationships among the entities, along with ontological constraints. The underlying mathematical framework supports extremely efficient inference. Our recent results show that by building on state-of-the-art optimization methods in a distributed implementation, we can solve large-scale knowledge graph extraction problems with millions of random variables orders of magnitude faster than existing approaches.

Program Summary

KEY: HIGHLIGHTED PAPER

-  = Candidate Best In-Use Paper
-  = Candidate Best Research Paper
-  = Controversial Paper
-  = Programm Committee Spotlight Paper

Workshops, Tutorials, PhD Symposium

Sunday, May 25th, 2014

	Ourania	Polymnia	Erato	Kalia	Melpo	Thalia	Efterpi	Clio	Orpheas

Main Conference Day

Tuesday, May 27th, 2014 (09:00 - 15:45)

	Room Hermes/Apollon TRACK 1	Room Polymnia/Erato/Kalia/Melpo TRACK 2
09:00 - 09:30	Opening Ceremony by General Chair and Local Representative	
09:30 - 11:00	Keynote Speech Steffen Staab: "Programming the Semantic Web" Session Chair: Fabien Gandon	
10:30 - 10:30	Coffee Break (Conference Center Lobby I & Lobby II)	
11:00 - 12:40	Mobile, Sensor and Semantic Streams Session Chair: Oscar Corcho	In-Use and Industrial I Session Chair: Mathieu d'Aquin
11:00	Shen Gao, Thomas Scharrenbach and Abraham Bernstein. The CLOCK Data-Aware Eviction Approach: Towards Processing Linked Data Streams with Limited Resources	Benedikt Kämpgen, Tobias Weller, Sean O'Riain, Craig Weber and Andreas Harth. Accepting the XBRL Challenge with Linked Data for Financial Data Integration 🧐
11:25	Kia Teymourian and Adrian Paschke. Plan-Based Semantic Enrichment of Event Streams	Freddy Lecue, Robert Tucker, Veli Bicer, Pierpaolo Tommasi, Simone Tallevi-Diotallevi and Marco Luca Sbodio. Predicting Severity of Road Traffic Congestion using Semantic Web Technologies 🏆
11:50	Luca Costabello. Error-Tolerant RDF Subgraph Matching for Adaptive Presentation of Linked Data on Mobile	Ali Khalili, Sören Auer and Axel-Cyrille Ngonga Ngomo. conTEXT -- Lightweight Text Analytics using Linked
12:15	Norberto Fernández García, Jesús Arias Fisteus, Luis Sánchez Fernández, Damaris Fuentes-Lorenzo and Óscar Corcho. RDSZ: An approach for lossless RDF stream compression	Alex Stolz, Bene Rodriguez-Castro, Andreas Radinger and Martin Hepp. PCS2OWL: A Generic Approach for Deriving Web Ontologies from Product Classification Systems
12:40 - 14:00	Lunch (Main Restaurant)	
14:00 - 14:50	Linked Data I Session Chair : Freddy Lecue	Social Web and Web Science Session Chair: Harald Sack
14:00	Tobias Kuhn and Michel Dumontier. TruSty URIs: Verifiable, Immutable, and Permanent Digital Artifacts for Linked Data 🏆	Hassan Saif, Miriam Fernandez, Yulan He and Harith Alani. SentiCircles for Contextual and Conceptual Semantic Sentiment analysis of Twitter
14:25	Saisai Gong, Wei Hu and Yuzhong Qu. Leveraging Distributed Human Computation and Consensus Partition for Entity Coreference	Pavan Kapanipathi, Prateek Jain, Chitra Venkataramani and Amit Sheth. User Interests Identification on Twitter Using a Hierarchical Knowledge Base
14:50 - 15:15	Services, Processes and Cloud Computing Session Chair : Freddy Lecue	Francesco Osborne, Giuseppe Scavo and Enrico Motta. Identifying diachronic topic-based research communities by clustering shared research trajectories 🏆
14:50	Carlos Pedrinaci, Jorge Cardoso and Torsten Leidig. Linked USDL: a Vocabulary for Web-scale Service Trading	
15:15 - 15:45	Coffee Break (Conference Center Lobby I & Lobby II)	

Main Conference Day

Tuesday, May 27th, 2014 (15:45 -21:30)

	Room Hermes/Apollon TRACK 1	Room Polymnia/Erato/Kalia/Melpo TRACK 2
15:45 - 17:00	Data Management I Session Chair : Maria-Esther Vidal	Natural Language Processing Session Chair: Harith Alani
15:45	Andreas Wagner, Veli Bicer and Thanh Tran. Pay-as-you-go Approximate Join Top-k Processing for the Web of Data	Dimitris Kontokostas, Martin Brümmer, Sebastian Hellmann, Jens Lehmann and Lazaros Ioannidis. NLP data cleansing based on Linguistic Ontology constraints 
16:10	Andreas Kasten, Ansgar Scherp and Peter Schauß. A Framework for Iterative Signing of Graph Data on the Web 	Mauro Dragoni, Alessio Bosca, Matteo Casu and Chiara Di Francescomarino. Using Semantic and Domain-based Information in CLIR Systems
16:35	Thomas Gotttron and Christian Gotttron. Perplexity of Index Models over Evolving Linked Data	Semantic Web Policies, Rights and Governance Session Chair : Pompeu Casanovas Elena Cabrio, Alessio Palmero Aprosio and Serena Villata. These are your rights: A Natural Language Processing Approach to Automated RDF Licenses Generation

	Room: Orpheas TRACK 3	Room: Thalia/Efterpi TRACK 4	Room: Polymnia/Erato TRACK 5	Beach Bar TRACK 6
17:00 - 18:30	EU Projects Networking Session Session Chairs: Mari Carmen Suarez de Figueroa Baonza, Sergio Consoli	AI Mashup Challenge Session Chair: Ioannis Papdakis	Semantic Web Evaluation Challenges Session Chair: Milan Stankovic	
17:00	One-minute madness: EU Projects presentations	1. Scherp, Ansgar: An Approach for Incremental Entity Resolution at the Example of Social Media Data 2. Trinh Tuan, Dat: Open Linked Widgets Mashup Platform	Angelo Di Iorio, Christoph Lange. Semantic Publishing Challenge: presentation of tasks	
17:30	EU Project networking round tables	3. Portier, Pierre-Edouard: SEMashup - Making Use of Linked Data for Generating Enhanced Snippets 4. Dell'Aglio, Daniele: Augmented Participation to Live Events through Social Network Content Enrichment 5. Khalili, Ali: conTEXT - A Mashup platform for Lightweight Text Analytics	Ivan Cantador, Tommaso Di Noia. Linked Open Data-enabled Recommender Systems Challenge: presentation of tasks	
18:00		LinkedUp Challenge Introduction Session Chair: Stefan Dietze	Erik Cambria, Diego Reforgiato. Concept-Level Sentiment Analysis Challenge: presentation of tasks.	
19:00 - 21:30				EU Project Posters Semantic Web Evaluation Challenges , AI Mashup Challenge, LinkedUp Challenge

Main Conference Day

Wednesday , May 28th, 2014 (09:15 -15:45)

	Room Hermes/Apollon TRACK 1	Room Polymnia/Erato/Kalia/Melpo TRACK 2
9:15 - 9:30	Announcements	
9:30 - 10:30	Keynote Speech Session Chair: Valentina Presutti Luciano Floridi : "Coordination, Semantics, and Autonomy"	
10:30 - 11:00	Coffee Break (Conference Center Lobby I & Lobby II)	
11:00 - 12:40	Reasoning Session Chair : Sebastian Rudolph	Machine Learning Session Chair: Lise Getoor
11:00	Martin Peters, Christopher Brink, Sabine Sachweh and Albert Zündorf. Scaling Parallel Rule-based Reasoning 	Ilaria Tiddi, Mathieu D'Aquin and Enrico Motta. Dedalo: looking for Clusters Explanations in a Labyrinth of Linked Data 
11:25	Arbab Dutta, Christian Meilicke and Simone Ponzetto. A Probabilistic Approach for Integrating Heterogeneous Knowledge Sources	Huakang Li, Yi Liu, Mingyi Guo and Bei Xu. A Knowledge Based Approach for Tackling Mislabeled Multi-class Big Social Data
11:50	Olivier Curé, Guillaume Blin, Dominique Revuz and David Célestin Faye. WaterFowl: a Compact, Self-indexed and Inference-enabled RDF Store	Thomas Gottron, Ansgar Scherp and Stefan Scheglmann. Providing Alternative Declarative Descriptions for Entity Sets using Parallel Concept Lattices 
12:15	Giorgos Stoilos. Ontology-Based Data Access Using Rewriting, OWL 2 RL Systems and Repairing	Axel-Cyrille Ngonga Ngomo, Mohamed Sherif and Klaus Lyko. Unsupervised Link Discovery Through Knowledge Base Repair 
12:40 - 14:00	Lunch (Main Restaurant)	
14:00 - 15:15	Linked Open Data II Session Chair: Vojtech Svatek	Cognition and Semantic Web Session Chair: Aldo Gangemi
14:00	Basil Eil, Andreas Harth and Elena Simperl. SPARQL Query Verbalization for Explaining Semantic Search Engine Queries	Paul Warren, Paul Mulholland, Trevor Collins and Enrico Motta. The usability of Description Logics: Understanding the cognitive difficulties presented by Description Logics 
14:25	Xin Wang, Thanassis Tiropanis and Hugh C. Davis. Optimising Linked Data Queries Using Runtime Statistics in the Presence of Co-reference 	Khadija Elbedweihy, Suvodeep Mazumdar, Stuart N. Wrigley and Fabio Ciravegna. NL-Graphs: A Hybrid Approach toward Interactively Querying Semantic Data 
14:50	Johann Schaible, Thomas Gottron and Ansgar Scherp. Survey on Common Strategies of Vocabulary Reuse in Linked Open Data Modeling	Paolo Ciancarini, Angelo Di Iorio, Andrea Giovanni Nuzzolese, Silvio Peroni and Fabio Vitali. Evaluating citation functions in CiTO: cognitive issues 
15:15 - 15:45	Coffee Break (Conference Center Lobby I & Lobby II)	

Main Conference Day

Wednesday , May 28th, 2014 (15:45 -20:00)

	Room Hermes/Apollon TRACK 1	Room Polymnia/Erato/Kalia/Melpo TRACK 2
15:50 - 17:00	Data Management II Session Chair: Jacco van Ossenbruggen	In-Use & Industrial II Session Chair: Evelyne Viegas
15:50	Muhammad Saleem and Axel-Cyrille Ngonga Ngomo. HiBISCuS: Hypergraph-Based Source Selection for SPARQL Endpoint Federation	Dan Scott. Seeding Structured Data by Default via Open Source Library Systems
16:15	Christina Lantzaki, Thanos Yannakis, Yannis Tzitzikas and Anastasia Analyti. Generating Synthetic RDF Data with Connected Blank Nodes for Benchmarking	Christoph Pinkel, Carsten Binnig, Peter Haase, Clemens Martin, Kunal Sengupta and Johannes Trame. How to Efficiently Find a Partner? An Evaluation of Editing Approaches to Construct R2RML Mappings
16:35	Roberto De Virgilio and Antonio Maccioni. Distributed Keyword Search over RDF via MapReduce 	László Török and Martin Hepp. Towards Portable Shopping Histories: Using GoodRelations to Expose Ownership Information to E-Commerce Sites
17:00 - 18:30	Panel: "Data Protection and Security on the Web" Session Chair: Valentina Presutti Panelists: Harith Alani, Pompeu Casanova, Luciano Floridi, Fabien Gandon, Aldo Gangemi, Steffen Staab, Evelyne Viegas, Maria Esther Vidal	
20:00	Conference Gala Dinner Aldemar Knossos Main Pool	

Main Conference Day

Thursday, May 29th, 2013

	Room Hermes/Apollon TRACK 1	Room Polymnia/Erato/Kalia/Melpo TRACK 2	Room Orpheas TRACK 3
09:00 - 11:00		Posters and Demos (Room Ourania/Polymnia/Erato/Kalia/Melpo/Thalia/Efterpi/Clio)	
11:00 - 11:30	Coffee Break (Conference Center Lobby I & Lobby II)		
11:30 - 12:30	Keynote Speech Session Chair: Claudia D'Amato Lise Getoor: "Combining Statistics and Semantics to Turn Data into Knowledge"		
12:30 - 14:00			
14:00 - 15:15	Linked Open Data III Session Chair: Abraham Bernstein	Vocabularies, Schemas, Ontologies Session Chair: Martin Hepp	Best Workshop Papers Session Chair: Harald Sack
14:00	Rakebul Hasan. Generating and Summarizing Explanations for Linked Data 	Benjamin Zapilko and Brigitte Mathiak. Benjamin Zapilko and Brigitte Mathiak. Object Property Matching utilizing the Overlap between Imported Ontologies	Please refer to page 72/73
14:25	Anisa Rula, Matteo Palmonari, Axel-Cyrille Ngonga Ngomo, Daniel Gerber, Jens Lehmann and Lorenz Bühmann. Hybrid Acquisition of Temporal Scopes for RDF Data	Yuan Ren, Artemis Parvizi, Chris Mellish, Jeff Z. Pan, Kees Van Deemter and Robert Stevens. Towards Competency Question-driven Ontology Authoring	
14:50	Dominik Wienand and Heiko Paulheim. Detecting Incorrect Numerical Data in DBpedia	Duy Dinh, Julio Cesar Dos Reis, Cedric Pruski, Marcos Da Silveira and Chantal Reynaud. Identifying change patterns of concept attributes in ontology evolution	
15:15 - 15:45	Coffee Break (Conference Center Lobby I & Lobby II)		
15:45 - 16:35	Linked Open Data IV Session Chair: Elena Simperl	In-Use & Industrial III Session Chair: Evelyne Viegas	Wrap-up session (Workshops, Tutorials, PhD Symposium)
15:45	Besnik Fetahu, Stefan Dietze, Bernardo Pereira Nunes, Marco Antonio Casanova, Davide Taibi and Wolfgang Nejdl. A Scalable Approach for Efficiently Generating Structured Dataset Topic Profiles	Jörg-Uwe Kietz, Floarea Serban, Simon Fischer and Abraham Bernstein. "Semantics Inside!" But let's not tell the Data Miners: Intelligent Support for Data Mining	Workshops and Tutorials Wrap-up Session Chairs: Harald Sack and Nathalie Aussenac-Gilles
16:10	Danyun Xu, Gong Cheng and Yuzhong Qu. Facilitating Human Intervention in Coreference Resolution with Comparative Entity Summaries	Yannis Tzitzikas, Nikos Minadakis, Yannis Marketakis, Pavlos Fafalios, Carlo Allocca, Michalis Mountantonakis and Ioanna Zidianaki. Matware: Constructing and Exploiting Domain Specific Warehouses by Aggregating Semantic	PhD Symposium Summary Session Chairs: Steffen Staab, Mathieu d'Aquin
16:35	Closing and Award Ceremony		

Sunday, May 25th

Workshop and Tutorial Day I

WORKSHOPS

USEWOOD 2014: BUILDING A WEB OBSERVATORY FOR RESEARCH ON LOD USAGE

Room Ourania | Sunday 25th | 09:30 - 18:00

Bettina Berendt | K.U. Leuven, BE

Markus Luczak-Roesch | University of Southampton, UK

Laura Hollink | VU Amsterdam, NL

SMILE 2014: SOCIAL MEDIA AND LINKED DATA FOR EMERGENCY RESPONSE

Room Polymnia | Sunday 25th | 09:30 - 13:00

Vita Lanfranchi | University of Sheffield, UK

Kauppinen Tomi | Aalto University, FI

Suvodeep Mazumdar | University of Sheffield, UK

Christopher Brewster | Aston University, UK

Eva Blomqvist | Linköping University, SE

Carsten Kessler | Hunter College—CUNY, US

LIME 2014: 2ND INTERNATIONAL WORKSHOP ON LINKED MEDIA

Room Kalia | Sunday 25th | 09:30 - 18:00

Lyndon Nixon | New Media Technology Group, MODUL University, AT

Johan Oomen | R&D Department, Netherlands Institute for Sound and Vision, NL

Erik Mannens | Multimedia Lab, iMinds, BE

Florian Stegmaier | University of Passau, DE

Raphaël Troncy | EURECOM, FR

SEMANTICSENTIMENTANALYSIS2014

Room Polymnia | Sunday 25th | 14:30 - 18:00

Aldo Gangemi | U. Paris Nord France/ISTC-CNR Rome, IT

Harith Alani | KMI-OU Milton Keynes, UK

Malvina Nissim | University of Bologna, IT

Eric Cambria | NUS Singapore, SE

Diego Reforgiato | ISTC-CNR Catania, IT

SEPUBLICA 2014

Room Erato | Sunday 25th | 14:30 - 18:00

Alexander Garcia Castro | Florida State University, US

Robert Stevens | University of Manchester, UK

Phillip Lord | School of Computing Science, Newcastle University, UK

Christoph Lange | University of Bonn, DE

KNOW@LOD 2014: KNOWLEDGE DISCOVERY AND DATA MINING MEETS LINKED OPEN DATA

Room Melpo | Sunday 25th | 09:30 - 18:00

Heiko Paulheim | University of Mannheim, DE

Johanna Voelker | University of Mannheim, DE

Harald Sack | Hasso-Plattner Institute, Potsdam, DE

Jens Lehmann | University of Leipzig, DE

Vojtech Svatek | University of Economics, Prague, CZ

TUTORIALS

SEMANTIC DATA MANAGEMENT IN GRAPH DATA BASES 2014

Room Thalia | Sunday 25th | 09:30 - 18:00

Maria-Esther Vidal | Universidad Simón Bolívar, VE

Maribel Acosta | Institute AIFB in the Karlsruhe Institute of Technology (KIT), DE

Edna Ruckhaus | Universidad Simón Bolívar, VE

Cosmin Basca | Universidad Simón Bolívar, VE

QA OVER LOD - QUESTION ANSWERING OVER LINKED DATA: CHALLENGES, APPROACHES & TRENDS

Room Efterpi | Sunday 25th | 09:30 - 13:00

Christina Unger | Bielefeld University in Germany, DE

André Freitas | National University of Ireland, Galway, IE

SOCIAL WEB: WHERE ARE THE SEMANTICS?

Room Clio | Sunday 25th | 09:30 - 18:00

Miriam Fernandez | KMI, Open University, Mealtton Keynes, UK

Andrés Garcia-Silva | OEG, UPM, Madrid, ES

Victor Rodriguez-Doncel | OEG, UPM, Madrid, ES

Oscar Corcho | OEG, UPM, Madrid, ES

RDF STREAM PROCESSING

Room Efterpi | Sunday 25th | 14:30 - 18:00

Jean-Paul Calbimonte | École Polytechnique Fédérale de Lausanne, FR

Daniele Dell'Aglio | Dip. di Elettronica, Informatica e Bioingegneria, Politecnico di Milano, IT

Marco Balduini | Dip. di Elettronica, Informatica e Bioingegneria, Politecnico di Milano, IT

PHD SYMPOSIUM

Room Orpheas | Sunday 25th | 09:30 - 18:00

Chairs:

Steffen Staab | Institute for Web Science and Technologies - WeST, Universität Koblenz-Landau, DE

Mathieu d'Aquin | Knowledge Media Institute, The Open University, UK

PHD SYMPOSIUM PAPERS

9:30-10:00

Introduction

10:00-11:00 (late stage submissions - 20mins)

On The Discovery of Relational Patterns in Semantically Similar Annotated Linked Data

Guillermo Palma

Predicting SPARQL Query Performance and Explaining Linked Data

Rakebul Hasan

Metrics-driven Framework for LOD Quality Assessment
Behshid Behkamal

11:00-13:00 (early stage submissions - 25mins)

Harvesting and Structuring Social Data in Music Information Retrieval
Sergio Oramas

Route planning using Linked Open Data
Pieter Colpaert

Automatic Detection and Semantic Formalisation of Business Rules
Cheikh Kacfeh Emani

Combining Linked Data and Statistical Information Retrieval
Ricardo Usbeck

Searching Linked Data and services with a single query
Mohamed Lamine Mouhoub

14:30-16:00 (early stage submissions - 25mins)

Semantic Information Extraction on Domain Specific Data Sheets
Kai Barkschat

Towards a Data Warehouse fed with Web Services
John Samuel

Designing an integrated semantic framework for structured opinion summarization
Ehsan Asgarian

16:30-17:15

Group session:

What are the most common issues/challenges in doing a PhD in the Semantic Web area?

Monday, May 26th

Workshop and Tutorial Day II

WORKSHOPS

WASABI 2014: WORKSHOP ON SEMANTIC WEB ENTERPRISE ADOPTION AND BEST PRACTICE

Room Ourania | Monday 26th | 09:30 - 13:00

Marco Neumann | iMinds – Multimedia Lab – Ghent University, BE

Sam Coppens | iMinds – Multimedia Lab – Ghent University, BE

Karl Hammar | iMinds – Multimedia Lab – Ghent University, BE

Magnus Knuth | iMinds – Multimedia Lab – Ghent University, BE

Dominique Ritze | iMinds – Multimedia Lab – Ghent University, BE

Miel Vander Sande | iMinds – Multimedia Lab – Ghent University, BE

SALAD 2014: SERVICES AND APPLICATIONS OVER LINKED APIS AND DATA

Room Polymnia | Monday 26th | 09:30 - 18:00

Maria Maleshkova | Karlsruhe Institute of Technology, DE

Ruben Verborgh | iMinds – Multimedia Lab – Ghent University, BE

Steffen Stadtmüller | Karlsruhe Institute of Technology, DE

Pedro Szekely | University of Southern California, US

HSWI 2014: HUMAN-SEMANTIC WEB INTERACTION

Room Erato | Monday 26th | 09:30 - 18:00

Heiko Paulheim | University of Mannheim, DE

Martin Voigt | Technische Universität Dresden, DE

Annett Mitschick | Technische Universität Dresden, DE

Roberto García | Universitat de Lleida, ES

FEOSW 2014

Room Kalía | Monday 26th | 09:30 - 13:00

Mateusz Radzinski | ATOS Research & Innovation, ES

Angel Garcia Crespo | University Carlos III of Madrid, ES

Juan Miguel Gomez Berbis | University Carlos III of Madrid, ES

José Luis Sánchez Cervantes | University Carlos III of Madrid, ES

PROFILES 2014: DATASET PROFILING & FEDERATED SEARCH FOR LINKED DATA

Room Ourania | Monday 26th | 14:30 - 18:00

Elena Demidova | L3S Research Center, DE

Stefan Dietze | L3S Research Center, DE

Julian Szymanski | Gdansk University of Technology, PL

John Breslin | NUI Galway, IE

WODOOM 2014: DEBUGGING ONTOLOGIES AND ONTOLOGY MAPPINGS

Room Kalia | Monday 26th | 14:30 - 18:00

Patrick Lambrix | Linköping University, SE

Guilin Qi | Southeast University, CN

Matthew Horridge | Stanford University, US

Bijan Parsia | University of Manchester, UK

EMPIRICAL 2014

Room Clio | Monday 26th | 14:30 - 18:00

Kjetil Kjernsmo | University of Oslo, NO

Maria Esther Vidal | Universidad Simón Bolívar, VE

Jacco van Ossenbruggen | CWI, VU University Amsterdam, NL

TUTORIALS

BABELNET 2.0 BABELNET GOES TO THE MULTILINGUAL SEMANTIC WEB

Room Melpo | Monday 26th | 09:30 - 13:00

Roberto Navigli | Sapienza University in Roma, IT

David Jurgens | Sapienza University in Roma, IT

VISLOD 2014 : VISUAL ANALYTICS WITH LINKED OPEN DATA AND SOCIAL MEDIA FOR E-GOVERNANCE

Room Thalia | Monday 26th | 09:30 - 18:00

Vita Lanfranchi | University of Sheffield, UK

Kauppinen Tomi | Aalto University, FI

Suvodeep Mazumdar | University of Sheffield, UK

RIGHTS AND LICENSES FOR LINKED DATA

Room Efterpi | Monday 26th | 09:30 - 18:00

Pompeu Casanovas | Universitat Autònoma de Barcelona, ES

Guido Governatori | NICTA Queensland Research Laboratory, AU

Victor Rodriguez-Doncel | OEG, UPM, Madrid, ES

Antonino Rotolo | Università di Bologna, IT

Serena Villata | INRIA Sophia Antipolis, FR

SCHEMA.ORG & GOODRELATIONS: THE WEB OF DATA FOR E-COMMERCE FOR RESEARCHERS AND PRACTITIONERS

Room Melpo | Monday 26th | 14:30 - 18:00

Martin Hepp | Universität der Bundeswehr München, DE

Alex Stolz | Universität der Bundeswehr München, DE

LINKEDUP CHALLENGE

Room Clio | Monday 26th | 09:30 - 13:00

Mathieu d'Aquin | Open University, UK

Stefan Dietze | L3S Research Center, DE

Hendrik Drachslér | Open Universiteit NL

Marieke Guy | Open Knowledge Foundation, UK

Eelco Herder | L3S Research Center, DE

OPEN TRACK

AGRIS – exploiting bibliographic records to create rich Linked Open Data page
Fabrizio Celli

DBLPXplorer: Interactive Graphical Interfaces for the Computer Science Bibliography
Ricardo Kawase | Ujwal Gadiraju | Patrick Siehndel

Konnektid – Social Learning Anytime, Anywhere
Michel Visser | Simone Potenza | Romee Houben

LODStories: Learning About Art by Building Multimedia Stories
Jianliang Chen | Yuting Liu | Dipanwita Maulik | Linda Xu | Hao Zhang | Craig A. Knoblock |
Pedro Szekely | Miel Vander Sande

Rhizi.net
Dor Garbash | Eyal Rotbart | William Zeng | Brendan Fong | Erik Edstrom | Jacob Cole | Calvin Fong |
Yael Ben Dov

Solvonauts : an open educational search engine
Pat Lockley

TuvaLabs – Data Literacy Skills for a Brighter Future
Harshil Parikh | Jaimin Patel | Benjamin Farahmand | Rachana Pandey

FOCUSED TRACK: SIMPLIFICATOR

The electronic Discharge Letter (eDL) mobile app
Leonardo Lezcano | Michel Triana | Bridget Maher | Pat Henn | Carola Orrego | Lina Stieger |
Hanna Schroeder | Susanne Druener | Sasa Sopka | Marcus Specht

Visualization of Labour Conflicts in the Netherlands for last 700 years
Vyacheslav Tykhonov

Tuesday, May 27th

Main Conference Day I

OPENING CEREMONY

Room Hermes/Apollon | Tuesday 27th | 09:00 - 09:30

General Chair

Local Representative

KEYNOTE SPEECH - STEFFEN STAAB: "PROGRAMMING THE SEMANTIC WEB"

Room Hermes/Apollon | Tuesday 27th | 09:30 - 10:30

Session Chair: Fabien Gandon

MOBILE, SENSOR AND SEMANTIC STREAMS

Room Hermes/Apollon | Tuesday 27th | 11:00 - 12:40

Session Chair: Oscar Corcho

11:00

The CLOCK Data-Aware Eviction Approach: Towards Processing Linked Data Streams with Limited Resources

Shen Gao | Thomas Scharrenbach | Abraham Bernstein

11:25

Plan-Based Semantic Enrichment of Event Streams

Kia Teymourian | Adrian Paschke

11:50

Error-Tolerant RDF Subgraph Matching for Adaptive Presentation of Linked Data on Mobile
Luca Costabello

12:15

RDSZ: An approach for lossless RDF stream compression"

Norberto Fernández García | Jesús Arias Fisteus | Luis Sánchez Fernández |

Damaris Fuentes-Lorenzo | Óscar Corcho

IN-USE AND INDUSTRIAL I

Room Polymnia/Erato/Kalia/Melpo | Tuesday 27th | 11:00 - 12:40

Session Chair: Mathieu D'Aquin

11:00

Accepting the XBRL Challenge with Linked Data for Financial Data Integration ☹

Benedikt Kämpgen | Tobias Weller | Sean O'Riain | Craig Weber | Andreas Harth

11:25

Predicting Severity of Road Traffic Congestion using Semantic Web Technologies ☹

Freddy Lecue | Robert Tucker | Veli Bicer | Pierpaolo Tommasi | Simone Tallevi-Diotallevis |

Marco Luca Sbodio

11:50

conTEXT -- Lightweight Text Analytics using Linked

Ali Khalili | Sören Auer | Axel-Cyrille Ngonga Ngomo

12:15

PCS2OWL: A Generic Approach for Deriving Web Ontologies from Product Classification Systems

Alex Stolz | Bene Rodriguez-Castro | Andreas Radinger | Martin Hepp

LINKED OPEN DATA I

Room Hermes/Apollon | Tuesday 27th | 14:00 - 14:50

Session Chair : Freddy Lecue

14:00

TruSty URIs: Verifiable, Immutable, and Permanent Digital Artifacts for Linked Data 🗿

Tobias Kuhn | Michel Dumontier

14:25

Leveraging Distributed Human Computation and Consensus Partition for Entity Coreference

Saisai Gong | Wei Hu | Yuzhong Qu

SOCIAL WEB AND WEB SCIENCE

Room Polymnia/Erato/Kalia/Melpo | Tuesday 27th | 14:00 - 15:15

Session Chair: Harald Sack

14:00

SentiCircles for Contextual and Conceptual Semantic Sentiment analysis of Twitter
Hassan Saif | Miriam Fernandez | Yulan He | Harith Alani

14:25

User Interests Identification on Twitter Using a Hierarchical Knowledge Base
Pavan Kapanipathi | Prateek Jain | Chitra Venkataramani | Amit Sheth

14:50

Identifying diachronic topic-based research communities by clustering shared research trajectories 
Francesco Osborne | Giuseppe Scavo | Enrico Motta

SERVICES, PROCESSES AND CLOUD COMPUTING

Room Hermes/Apollon | Tuesday 27th | 14:50 - 15:15

Session Chair : Freddy Lecue

14:50

Linked USDL: a Vocabulary for Web-scale Service Trading
Carlos Pedrinaci | Jorge Cardoso | Torsten Leidig

DATA MANAGEMENT I

Room Hermes/Apollon | Tuesday 27th | 15:45 - 17:00

Session Chair : Maria-Esther Vidal

15:45

Pay-as-you-go Approximate Join Top-k Processing for the Web of Data
Andreas Wagner | Veli Bicer | Thanh Tran

16:10

A Framework for Iterative Signing of Graph Data on the Web 🗨

Andreas Kasten | Ansgar Scherp | Peter Schauß

16:35

Perplexity of Index Models over Evolving Linked Data

Thomas Gottron | Christian Gottron

NATURAL LANGUAGE PROCESSING

Room Polymnia/Erato/Kalia/Melpo | Tuesday 27th | 15:45 - 17:00

Session Chair: Harith Alani

15:45

NLP data cleansing based on Linguistic Ontology constraints 🗨

Dimitris Kontokostas | Martin Brümmer | Sebastian Hellmann | Jens Lehmann | Lazaros Ioannidis

16:10

Using Semantic and Domain-based Information in CLIR Systems

Mauro Dragoni | Alessio Bosca | Matteo Casu | Chiara Di Francescomarino

SEMANTIC WEB POLICIES, RIGHTS AND GOVERNANCE

Room Polymnia/Erato/Kalia/Melpo | Tuesday 27th | 16:35 - 17:00

Session Chair : Pompeu Casanovas

16:35

These are your rights: A Natural Language Processing Approach to Automated RDF Licenses Generation

Elena Cabrio | Alessio Palmero Aprosio | Serena Villata

EU PROJECT NETWORKING SESSION

Room Orpheas | Tuesday 27th | 17:00 - 18:30

Session Chairs: Mari Carmen Suarez de Figueroa Baonza | Sergio Consoli

17:00 - 17:30

One-minute madness: EU Project presentations

17:30- 18:30

EU networking round tables

CityPulse: Real-Time IoT Stream Processing and Large-scale Data Analytics for Smart City Applications
Payam Barnaghi | Ralf Tönjes | Jan Holler | Manfred Hauswirth | Amit Sheth | Pramod Anantharam

The GeoKnow Project
Jens Lehmann | Axel-Cyrille Ngonga Ngomo

LinkedTV: Web and TV seamlessly interlinked using semantic technology
Lyndon Nixon | Raphaël Troncy.

PERICLES EU Integrated Project: Research Strategy and First Results
Efstratios Kontopoulos | Fabio Corubolo | Anna Grit Eggers | Jens Ludwig | Mark Hedges | Simon Waddington | Jean-Pierre Chanod | Jean-Yves Vion-Dury | Nikolaos Lagos | Adil Hasan | Sándor Darányi | Ioannis Kompatsiaris

PlanetData: A European Network of Excellence on Large-Scale Data Management
Irina Fundulaki

BioASQ: A challenge on large-scale biomedical semantic indexing and question answering
Georgios Paliouras | Yannis Almirantis | Michael Alvers | Ion Androutopoulos | Thierry Artieres | Georgios Balikas | Liliana Barrio-Alvers | Nicolas Baskiotis | Norman Heino | Patrick Gallinari | Eric Gaussier | Anastasia Krithara | Prodromos Malakasiotis | Axel-Cyrille Ngonga Ngomo | Ioannis Partalas | John Pavlopoulos | Dimitris Polychronopoulos | Michael Schroeder | George Tsatsaronis | Dirk Weissenborn | Matthias Zschunke.

SemaGrow: Data Intensive Techniques to Boost the Real-Time Performance of Global Agricultural Data Infrastructures

Angelos Charalambidis | Stasinos Konstantopoulos

COINVENT: Concept Invention Theory - Ontologies and Semantic Web Technologies for Concept Invention

Marco Schorlemmer | Alan Smaill | Kai-Uwe Kuehnberger | Oliver Kutz | Simon Colton | Emiliós Cambouropoulos | Alison Pease.

COMSODE: Component Supporting the Open

Andrea Maurino

EUCLID: EdUcational Curriculum for the usage of Linked Data

Elena Simperl

SIFEM: Using semantic technologies to support Finite Element biosimulations

Andre Freitas | Ratnesh Sahay

The Linked Data Benchmark Council (LDBC)

Ioan Toma | Irini Fundulak | Vladimir Alexiev

EPPICS: Event Prediction and Decision Support based on Huge Data from Physical-Social Systems

Lars Schmidt-Thieme | Achim Rettinger

Linked Open Earth Observation Data: The LEO Project

Manolis Koubarakis | Ioannis Vlachopoulos

MULTISENSOR: Mining and Understanding of multilingual content for Intelligent Sentiment Enriched context and Social Oriented interpretation

Stefanos Vrochidis | Ioannis Kompatsiaris | Vladimir Alexiev | Gerard Casamayor | Enric Staro-miejski | Ioannis Arapakis | Reinhard Busch | Michael Jugov | Nicolaus Heise | Teresa Forrellat | Anastasia Mourtzidou | Maurice Grinberg | Leo Wanner, Alan Mas Soro | Iris Miliarak | Vera Aleksa | Mirja Eckhoff | Tilman Wagner | Sara Pedraz

SEMANCO Semantic Tools for Carbon Reduction in Urban Planning
Leandro Madrazo | Alvaro Sicilia | German Nemirovski.

READY4SmartCities: ICT Roadmap and Data Interoperability for Energy Systems in Smart Cities
Raúl García-Castro | Asunción Gómez-Pérez.

Managing Risks and Opportunities in Online Business Communities: The ROBUST Project
Thomas Gottron | Steffen Staab

PRELIDA - Preserving Linked Data
Grigoris Antoniou | Sotiris Batsakis

AnnoMarket – Multilingual Text Analytics at Scale on the Cloud
Marin Dimitrov | Helen Lippell | Ian Roberts | Petar Kostov | Hamish Cunningham | Philippe Rigaux

DaPaaS – A Data- and Platform-as-a-Service Approach to Efficient Open Data Publication and Consumption
Marin Dimitrov | Dumitru Roman | Bill Roberts | Tony Lee | Tom Heath | Momchill Zarev.

xLiMe: Cross-lingual Cross-media Knowledge Extraction
Achim Rettinger

XLike: Cross-lingual Knowledge Extraction
Marko Grobelnik | Achim Rettinger

Khresmoi: semantics in medical search
Henning Müller | Allan Hanbury | Angus Roberts | Konstantin Pentchev | Vassil Momtchev

Fusepool (SME) for Information Pooling for Product/Service Development and Research
Michael Kaschesky

LIDER: Linked Data as an enabler of cross-media and multilingual content analytics
for enterprises across Europe
Philipp Cimiano

BYTE - Big data roadmap and cross disciplinary community for addressing societal Externalities
José María García | Kush Wadhwa | Hans Lammerant | Lorenzo Bigagli | Arild Waaler | Edward
Curry | Peter Stefan | Scott Cunningham | Stéphane Grumbach | Grunde Løvoll | Sebnem Rusitschka

ReThinkBig Collaborative Support Action
Gaelle Lortal | Christophe Gouguenheim | David Faure | Claire Laudy | Rethinkbig Consortium Disse-
mination Lead

AI MASHUP CHALLENGE

Room Thalia/Efterpi | Tuesday 27th | 18:00 - 18:30

Session Chair: Ioannis Papdakis

01. An Approach for Incremental Entity Resolution at the Example of Social Media Data
Ansgar Scherp
02. Open Linked Widgets Mashup Platform
Dat Trinh Tuan
03. SEMashup - Making Use of Linked Data for Generating Enhanced Snippets
Pierre-Edouard Portier
04. Augmented Participation to Live Events through Social Network Content Enrichment
Daniele Dell'Aglia
05. conTEXT - A Mashup platform for Lightweight Text Analytics
Ali Khalili

LINKEDUP CHALLENGE

Room: Thalia/Efterpi Tuesday 27th 18:00 - 18:30

Session Chair: Stefan Dietze

LinkedUp Challenge Introduction - Minute Madness Presentation by LinkedUp competing participants.

SEMANTIC WEB EVALUATION CHALLENGES (SEMWEBEVAL 2014)

Room: Polymnia/Erato | Tuesday 27th | 17:00 - 18:30

Session Chair: Milan Stankovic

This year, for the first time, ESWC will include the SemWebEval Track: Three challenges, which feature state of the art and groundbreaking contributions - applications that deal with some of the most interesting challenges that the Semantic Web community is facing. A total amount of 2100 euros will be distributed among the best systems as challenges prizes. The evaluation datasets, task descriptions, and best systems presented in the context of SemWebEval will be the focus of a Semantic Web Journal special issue dedicated to ESWC 2014. In this session the Challenges Chairs will briefly describe the challenge tasks, the evaluation process and material. The competing contributions will be presented as posters and demos immediately after this session at the Beach Bar.

17:00

Semantic Publishing Challenge: presentation of tasks

Angelo Di Iorio | Christoph Lange

17:30

Linked Open Data-enabled Recommender Systems Challenge: presentation of tasks

Ivan Cantador | Tommaso Di Noia

18:00

Concept-Level Sentiment Analysis Challenge: presentation of tasks

Erik Cambria | Diego Reforgiato

SEMANTIC PUBLISHING CHALLENGE

ROHub – A digital library of Research Objects supporting scientists towards reproducible science
Raul Palma | Oscar Corcho | José Manuel Gómez-Pérez | Cezary Mazurek

Unstable markup: A template-based information extraction from web sites with unstable markup
Maxim Kolchin | Fedor Kozlov

Linkitup: Semantic Publishing of Research Data
Rinke Hoekstra | Paul Groth | Marat Charlaganov

Understanding Research Dynamics
Francesco Osborne | Enrico Motta

Semantify CEUR-WS Proceedings: towards the automatic generation of highly descriptive scholarly publishing Linked Datasets
Francesco Ronzano | Gerard Casamayor Del Bosque | Horacio Saggion

Extraction of workshop proceedings in HTML using the RML mapping language
Anastasia Dimou | Miel Vander Sande | Pieter Colpaert | Laurens De Vocht | Ruben Verborgh | Erik Mannens | Rik Van de Walle

Faceted Semantic Search for Scientific Publications
Iana Atanassova | Marc Bertin

Hybrid Approach for the Semantic Processing of Scientific Papers
Marc Bertin | Iana Atanassova

LINKED OPEN DATA-ENABLED RECOMMENDER SYSTEMS CHALLENGE

Hybrid Recommending Exploiting Multiple DBPedia Language Editions

Ladislav Peska | Peter Vojtas

A Hybrid Multi-Strategy Recommender System Using Linked Open Data

Petar Ristoski | Eneldo Loza Mencía | Heiko Paulheim

Exploring Semantic Features for Producing Top-N Recommendation Lists from Binary User Feedback

Nicholas Ampazis | Theodoros Emmanouilidis

Aggregation Strategies for Linked Open Data-enabled Recommender Systems

Pierpaolo Basile | Cataldo Musto | Marco De Gemmis | Pasquale Lops | Fedelucio Narducci |

Giovanni Semeraro

SemStim at the LOD-RecSys 2014 challenge

Benjamin Heitmann | Conor Hayes

LODify: A Hybrid Recommender System based on Linked Open Data

Rouzbeh Meymandpour | Joseph Davis

Popular Books and Linked Data: Some Results for the ESWC'14 RecSys Challenge

Michael Schuhmacher | Christian Meilicke

Semantic Pattern-based Recommender

Valentina Maccatrozzo | Davide Ceolin | Lora Aroyo | Paul Groth

Increasing Top-20 diversity through recommendation post-processing

Matevz Kunaver | Tomaz Pozrl | Stefan Dobravec | Andrej Kosir

Hybrid model rating prediction with Linked Open Data for Recommender Systems

Andrés Moreno | Christian Ariza-Porras | Paula Lago | Claudia Lucía Jiménez-Guarín | Harold Castro |

Michel Riveill

Deep Learning of Semantic Word Representations to Implement a Content-based Recommender for the RecSys Challenge'14
Omar U. Florez

CONCEPT-LEVEL SENTIMENT ANALYSIS CHALLENGE

A Fuzzy System For Semantic Sentiment Analysis
Mauro Dragoni | Andrea Tettamanzi | Celia Da Costa Pereira

Lechuzo: Weakly-Supervised System for Fine-Grained Sentiment Analysis
Nir Ofek | Lior Rokach

Semantic Lexicon Induction for Concept-level Sentiment Analysis
Pablo Mendes | Anni Coden | Daniel Gruhl | Neal Lewis | Meena Nagarajan | Cartic Ramakrishnan | Michael Tannenblatt | Steve Welch

Sentic Demo: A Hybrid Concept Level Aspect Based Sentiment Analysis Toolkit

Jay Kuan-Chieh Chung | Chi-En Wu | Richard Tzong-Han Tsai

EU PROJECT POSTERS SEMANTIC WEB EVALUATION CHALLENGES, AI MASHUP CHALLENGE, LINKEDUP CHALLENGE

Beach Bar | Tuesday 27th | 19:00 - 21:30

Dinner in form of a buffet as well as drinks will be provided during the session at the Beach Bar.

Wednesday, May 28th

Main Conference Day II

ANNOUCEMENTS

Room Hermes/Apollon | Wednesday 28th | 09:15 - 09:30

KEYNOTE SPEECH

Room Hermes/Apollon | Wednesday 28th | 09:30 - 10:30

Session Chair: Valentina Presutti

Luciano Floridi | "Coordination, Semantics, and Autonomy"

REASONING

Room Hermes/Apollon | Wednesday 28th | 11:00 - 12:40

Session Chair : Sebastian Rudolph

11:00

Scaling Parallel Rule-based Reasoning 

Martin Peters | Christopher Brink | Sabine Sachweh | Albert Zündorf

11:25

A Probabilistic Approach for Integrating Heterogeneous Knowledge Sources

Arnab Dutta | Christian Meilicke | Simone Ponzetto.

11:50

WaterFowl: a Compact, Self-indexed and Inference-enabled RDF Store

Olivier Curé | Guillaume Blin | Dominique Revuz | David Célestin Faye

12:15

Ontology-Based Data Access Using Rewriting, OWL 2 RL Systems and Repairing
Giorgos Stoilos

MACHINE LEARNING

Room Polymnia/Erato/Kalia/Melpo | Wednesday 28th | 11:00 - 12:40

Session Chair: Lise Getoor

11:00

Dedalo: looking for Clusters Explanations in a Labyrinth of Linked Data 🗿

Ilaria Tiddi | Mathieu D'Aquin | Enrico Motta

11:25

A Knowledge Based Approach for Tackling Mislabeled Multi-class Big Social Data

Huakang Li | Yi Liu, Mingyi Guo | Bei Xu

11:50

Thomas Gottron, Ansgar Scherp and Stefan Scheglmann.

Providing Alternative Declarative Descriptions for Entity Sets using Parallel Concept Lattices 🗿

Thomas Gottron | Ansgar Scherp | Stefan Scheglmann

12:15

Unsupervised Link Discovery Through Knowledge Base Repair 💬

Axel-Cyrille Ngonga Ngomo | Mohamed Sherif | Klaus Lyko

LINKED OPEN DATA II

Room Hermes/Apollon | Wednesday 28th | 14:00 - 15:20

Session Chair : Vojtech Svatek

14:00

SPARQL Query Verbalization for Explaining Semantic Search Engine Queries

Basil Eil | Andreas Harth | Elena Simperl

14:25

Optimising Linked Data Queries Using Runtime Statistics in the Presence of Co-reference 
Xin Wang | Thanassis Tiropanis | Hugh C. Davis.

14:50

Survey on Common Strategies of Vocabulary Reuse in Linked Open Data Modeling
Johann Schaible | Thomas Gottron | Ansgar Scherp

COGNITION AND SEMANTIC WEB

Room Polymnia/Erato/Kalia/Melpo | Wednesday 28th | 14:00 - 15:20

Session Chair: Aldo Gangemi

14:00

The usability of Description Logics: Understanding the cognitive difficulties presented
by Description Logics 
Paul Warren | Paul Mulholland | Trevor Collins | Enrico Motta

14:25

NL-Graphs: A Hybrid Approach toward Interactively Querying Semantic Data 
Khadija Elbedweihy | Suvodeep Mazumdar | Stuart N. Wrigley | Fabio Ciravegna

14:50

Evaluating citation functions in CiTO: cognitive issues 
Paolo Ciancarini | Angelo Di Iorio | Andrea Giovanni Nuzzolese | Silvio Peroni | Fabio Vitali

DATA MANAGEMENT II

Room Hermes/Apollon | Wednesday 28th | 15:50 - 17:00

Session Chair: Jacco van Ossenbruggen

15:50

HiBISCuS: Hypergraph-Based Source Selection for SPARQL Endpoint Federation
Muhammad Saleem | Axel-Cyrille Ngonga Ngomo

16:15

Generating Synthetic RDF Data with Connected Blank Nodes for Benchmarking
Christina Lantzaki | Thanos Yannakis | Yannis Tzitzikas | Anastasia Analyti

16:35

Distributed Keyword Search over RDF via MapReduce 
Roberto De Virgilio | Antonio Maccioni

IN-USE & INDUSTRIAL II

Room Polymnia/Erato/Kalia/Melpo | Wednesday 28th | 15:50 - 17:00

Session Chair: Evelyne Viegas

15:50

Seeding Structured Data by Default via Open Source Library Systems
Dan Scott

16:15

How to Efficiently Find a Partner? An Evaluation of Editing Approaches to Construct R2RML Mappings
Christoph Pinkel | Carsten Binnig | Peter Haase | Clemens Martin | Kunal Sengupta | Johannes Trame

16:35

Towards Portable Shopping Histories: Using GoodRelations to Expose Ownership Information to E-Commerce Sites
László Török | Martin Hepp

PANEL: "DATA PROTECTION AND SECURITY ON THE WEB"

Room Hermes/Apollon | Wednesday 28th | 17:00 - 18:30

Session Chair: Valentina Presutti, STLab ISTC-CNR, IT

Panelists: Harith Alani (KIM Open University, UK) | Pompeu Casanova (Universitat Autònoma de Barcelona, ES) | Luciano Floridi (University of Oxford, UK) | Fabien Gandon (Inria, FR) |

Aldo Gangemi (Université Paris 13- CNRS, FR / ISTC-CNR Rome, IT) | Steffen Staab (Universität Koblenz-Landau, DE) | Maria Esther Vidal (Universidad Simón Bolívar, VE) | Evelyne Viegas (Microsoft Research, US)

On March 12th, in occasion of the 25th birthday of the World Wide Web, Sir Tim Berners-Lee made an open call for a "Magna Carta" to protect Web users. He said: "It's time for us to make a big communal decision. In front of us are two roads — which way are we going to go? Are we going to continue on the road and just allow the governments to do more and more and more control — more and more surveillance? Or are we going to set up a bunch of values? Are we going to set up something like a Magna Carta for the World Wide Web and say, actually, now it's so important, so much part of our lives, that it becomes on a level with human rights?"

We all know that guaranteeing privacy and security at the same time in a world without the WWW is a challenge, and that each country addresses it in a different way by means of local regulations as well as international agreements. Identifying the right tradeoff on the Web is probably even more complicated, as we deal with a virtual world, where geographical borders loose their importance and role.

The aim of this panel is to identify and discuss the most important issues that should be addressed in order to guarantee web users privacy, on one hand, without putting their security in danger, and web users security, on the other hand, without limiting their freedom by invading their private lives. Can semantics play any role in this trade-off?

We ask our panelists to summarize in three main statements their view on, and possibly their solution to, this problem, hence giving their advice to the definition of a Web users "Magna Carta". This vision is also supported by the "Web We Want" initiative launched by the Web Foundation for gathering people from around the world and collaboratively draft such bill of rights.

ESWC 2014 CONFERENCE GALA DINNER

Aldemar Knossos Main Pool | Wednesday, May 28th | 20:00

YOUR EVENING

19:30

WELCOMING GUESTS WITH AN APERITIVE AND LIVE MUSIC

20:30

GALA DINNER

22:00 - 23:00

LIVE MUSIC

23:00 - 02:00

DANCING WITH DJ

Thursday, May 29th

Main Conference Day III

DEMOS AND POSTERS

Room Ourania/Polymnia/Erato/Kalia/Melpo/Thalia/Efterpi/Clio | Wednesday 28th | 09:00 - 11:00

DEMOS

- 01 AnnoMarket - Multilingual Text Analytics at Scale on the Cloud
Marin Dimitrov | Helen Lippell | Ian Roberts | Alex Simov | Hamish Cunningham | Philippe Rigaux
- 02 A Demonstration of a Natural Language Query Interface to an Event-Based Semantic Web Triplestore
Richard Frost | Jonathan Donais | Eric Matthews | Wale Agboola | Robert Stewart
- 03 A Rule-Based System for Monitoring of Microblogging Disease Reports
Wojciech Lukasiewicz | Kia Teymourian | Adrian Paschke
- 04 Securing Access to Sensitive RDF Data
Vassilis Papakonstantinou | Giorgos Flouris | Irini Fundulaki | Haridimos Kondylakis
- 05 Publication of RDF streams with Ztreamey
Jesus Arias Fisteus | Norberto Fernandez Garcia | Luis Sanchez Fernandez | Damaris Fuentes-Lorenzo
- 06 SparqlFilterFlow: SPARQL Query Composition for Everyone
Florian Haag | Steffen Lohmann | Thomas Ertl
- 07 The ProtegeVOWL Plugin: Ontology Visualization for Everyone
Steffen Lohmann | Stefan Negru | David Bold
- 08 Visualizing RDF Data Cubes using the Linked Data Visualization Model
Jiri Helmich | Jakub Klimek | Martin Necasky
- 09 SmarT INSiGhts (STING) - An Intelligence Application for Querying Heterogeneous Databases
Vikash Kumar | Ganesh Selvaraj | Andy Shin | Paulo Gottgroy

- 10 **Durchblick - A Conference Assistance System for Augmented Reality Devices**
Anas Alzoghbi | Peter Fischer | Anna Gossen | Peter Haase | Beibei Hu | Georg Lausen | Christoph Pinkel
- 11 **FAGI-tr: A tool for aligning geospatial RDF vocabularies**
Giorgos Giannopoulos | Thomas Maroulis | Dimitrios Skoutas | Nikos Karagiannakis | Spiros Athanasiou
- 12 **Painless URI dereferencing using The DataTank**
Pieter Colpaert | Ruben Verborgh | Erik Mannens
- 13 **Aether - Generating and Viewing Extended VoID Statistical Descriptions of RDF Datasets**
Eetu Makela
- 14 **Combining a REST Lexical Analysis Web Service with SPARQL for Mashup Semantic Annotation from Text**
Eetu Makela
- 14 **Geographic Summaries from Crowdsourced Data**
Giuseppe Rizzo | Giacomo Falcone | Rosa Meo | Ruggero Pensa | Raphael Troncy | Vuk Milicic
- 15 **CORNER: A Completeness Reasoner for the Semantic Web**
Fariz Darari | Radityo Eko Prasojó | Werner Nutt
- 16 **SPARQL SAHA, a Configurable Linked Data Editor and Browser as a Service**
Eetu Makela | Eero Hyvonen
- 17 **Towards a Semantic Web Platform for Finite Element Simulations**
Andre Freitas | Kartik Asooja | Swapnil Soni | Marggie Jones | Panagiotis Hasapis | Ratnesh Sahay

- 18 dime: A Context-Aware Information System
Simon Scerri | Ismael Rivera | Jeremy Debattista | Simon Thiel | Keith Cortis | Judie Attard | Christian Knecht | Andreas Schuller | Fabian Hermann
- 19 Boosting QAKiS with multimedia answer visualization
Elena Cabrio | Vivek Sachidananda | Raphael Troncy
- 20 Dendro: collaborative research data management built on linked open data
Joao Rocha Da Silva | Joao Castro | Cristina Ribeiro | Joao Correia Lopes
- 21 TRTML - A Tripleset Recommendation Tool based on Supervised Learning Algorithm
Alexander Arturo Mera Caraballo | Narciso Moura Arruda Junior | Bernardo Pereira Nunes | Giseli Rabello Lopes | Marco Antonio Casanova
- 22 LinkLion: A Link Repository for the Web of Data
Markus Nentwig | Tommaso Soru | Axel-Cyrille Ngonga Ngomo | Erhard Rahm
- 23 Distant Supervision for Relation Extraction using Ontology Class Hierarchy-Based Features
Pedro H. R. Assis | Marco A. Casanova
- 24 IDE Integrated RDF Exploration | Access and RDF-based Code Typing with LITEQ
Stefan Scheglmann | Martin Leinberger | Steffen Staab | Ralf Laemmel | Matthias Thimm | Evelyn Viegas
- 25 Kuphi - An Investigation Tool for Searching for and via Semantic Relations
Michael Farber | Lei Zhang | Achim Rettinger
- 26 Making use of Linked Data for Generating Enhanced Snippets
Mazen Alsarem | Pierre-Edouard Portier | Sylvie Calabretto
- 27 LinkZoo: A linked data platform for collaborative management of heterogeneous resources
Marios Meimaris | Giorgos Alexiou | George Papastefanatos

- 28 Augmenting TV Newscasts via Entity Expansion
Jose Luis Redondo-Garcia | Michiel Hildebrand | Lilia Perez Romero | Raphael Troncy
- 29 Analyzing Linked Data Quality with LiQuate
Edna Ruckaus | Maria-Esther Vidal | Simon Castillo | Oscar Burguillos | Oriana Baldizan
- 30 Big, Linked and Open Data: Applications in the German Aerospace Center
Kallirroi Dogani | Charalampos Nikolaou | Konstantina Bereta | Kostis Kyzirakos |
Manolis Koubarakis | Stella Giannakopoulou | Panayiotis Smeros | George Garbis |
Daniela Espinoza Molina | Octavian Corneliu Dimitru | Gottfried Schwarz and Mihai Datchu
- 31 morph-LDP: An R2RML-based Linked Data Platform implementation
Nandana Mihindukulasooriya | Freddy Priyatna | Oscar Corcho | Raul Garcia Castro |
Miguel Esteban Gutierrez
- 32 Prod-Trees: Semantic Search for Earth Observation Products
Kallirroi Dogani | Maria Karpathiotaki | Manolis Koubarakis | Bernard Valentin |
Paolo Mazzetti | Mattia Santoro | Sabina Di Franco
- 33 ODCleanStore: An ETL Framework for Sustainable RDF Data Processing
Tomas Knap | Maria Kukhar | Bohuslav Machac | Petr Skoda | Jiri Tmes | Jan Vojt
- 34 Using semantic technologies for scalable multi-channel communication
Ioan Toma | Christoph Fuchs | Corneliu Stanciu | Dieter Fensel
- 35 SCS Connector - Quantifying and Visualising Semantic Paths between Entity Pairs
Bernardo Pereira Nunes | Jose Eduardo Talavera Herrera | Davide Taibi | Giseli Rabello Lopes |
Marco Antonio Casanova | Stefan Dietze
- 36 Browsing DBpedia Entities with Summaries
Andreas Thalhammer | Achim Rettinger

- 37 Graphium Chrysalis: Exploiting Graph Database Engines to Analyze RDF Graphs
Alejandro Flores | Maria Esther-Vidal | Guillermo Palma
- 38 Collaborative Semantic Management and Automated Analysis of Scientific Literature
Bahar Sateli | Rene Witte
- 39 SemLAV: Querying Deep Web and Linked Open Data with SPARQL
Pauline Folz | Gabriela Montoya | Hala Skaf-Molli | Pascal Molli | Maria Esther Vidal
- 40 Olap4LD - A Framework for Building Analysis Applications over Governmental Statistics
Benedikt Kampgen | Andreas Harth
- 41 VideoLecturesMashup: using media fragments and semantic annotations to enable
topic-centred e-learning
Lyndon Nixon | Tanja Zdolsek | Ana Fabjan | Peter Kese
- 42 Modelling OWL ontologies with Graffoo
Riccardo Falco | Aldo Gangemi | Silvio Peroni | David Shotton | Fabio Vitali

POSTERS

- 01 Ranking Entities in a Large Semantic Network
Michael Schuhmacher | Simone Paolo Ponzetto
- 02 A Semantic Web Based Core Engine to Efficiently Perform Sentiment Analysis
Diego Reforgiato | Sergio Consoli | Aldo Gangemi | Andrea Nuzzolese | Daria Spampinato
- 03 Linked Data Finland: A 7-star Model and Platform for Publishing and Re-using Linked Datasets
Eero Hyvonen | Jouni Tuominen | Miika Alonen | Eetu Makela

- 04 A Semantic Approach to Support Cross Border e-Justice
Enrico Francesconi | Ginevra Peruginelli | Ernst Steigenga | Daniela Tiscornia
- 05 Predicting SPARQL Query Performance
Rakebul Hasan | Fabien Gandon
- 06 Balloon Synopsis: A Modern Node-Centric RDF Viewer and Browser for the Web
Kai Schlegel | Thomas Weigerber | Florian Stegmaier | Christin Seifert |
Michael Granitzer | Harald Kosch
- 07 Annotating Ontologies with Descriptions of Vagueness
Panos Alexopoulos | Silvio Peroni | Boris Villazon-Terrazas | Jeff Z. Pan
- 08 Rapid Deployment of a RESTful Service for Data Collected by Oceanographic Research Cruises
Linyun Fu | Robert Arko
- 09 SPARQL-MM - Extending SPARQL to Media Fragments
Thomas Kurz | Sebastian Schaffert | Florian Stegmaier | Kai Schlegel | Harald Kosch
- 10 RuQAR : Reasoning Framework for OWL 2 RL Ontologies
Jaroslaw Bak | Maciej Nowak | Czeslaw Jedrzejek
- 11 The Normalized Freebase Distance
Frederic Godin | Tom De Nies | Christian Beecks | Laurens De Vocht | Wesley De Neve |
Erik Mannens | Thomas Seidl | Rik Van de Walle
- 12 An Investigation of HTTP Header Information for Detecting Changes of Linked Open Data Sources
Renata Dividino | Andre Kramer | Thomas Gottron
- 13 rdf:SynopsViz - A Framework for Hierarchical Linked Data Visual Exploration and Analysis
Nikos Bikakis | Melina Skourla | George Papastefanatos

- 14 TMR: A Semantic Recommender System using Topic Maps on the Items' Descriptions
Angel Luis Garrido | Sergio Ilarri
- 15 Data Cleansing Consolidation with PatchR
Magnus Knuth | Harald Sack
- 16 What are the Important Properties of an Entity? Comparing Users
and Knowledge Graph Point of View
Ahmad Assaf | Ghislain Atemezing | Raphael Troncy | Elena Cabrio
- 17 LiFR: A Lightweight Fuzzy DL Reasoner
Dorothea Tsatsou | Stamatia Dasiopoulou | Ioannis Kompatsiaris | Vasileios Mezaris
- 18 LUMO: The LinkedTV User Model Ontology
Dorothea Tsatsou | Vasileios Mezaris
- 19 Improving the online visibility of touristic service providers by using semantic annotations
Ioan Toma | Corneliu Valentin Stanciu | Anna Fensel | Ioannis Stavrakantonakis | Dieter Fensel
- 20 A companion screen application for TV broadcasts annotated with Linked Open Data
Lyndon Nixon | Lotte Baltussen | Lilia Perez Romero | Lynda Hardman

KEYNOTE SPEECH

Room Hermes/Apollon | Thursday 29th | 11:30 - 12:30

Session Chair: Claudia D'Amato

Lise Getoor: "Combining Statistics and Semantics to Turn Data into Knowledge"

LINKED OPEN DATA III

Room Hermes/Apollon | Thursday 29th | 14:00 - 15:15

Session Chair: Abraham Bernstein

14:00

Generating and Summarizing Explanations for Linked Data 

Rakebul Hasan

14:25

Hybrid Acquisition of Temporal Scopes for RDF Data

Anisa Rula | Matteo Palmonari | Axel-Cyrille Ngonga Ngomo | Daniel Gerber | Jens Lehmann |

Lorenz Bühmann

14:50

Detecting Incorrect Numerical Data in DBpedia

Dominik Wienand | Heiko Paulheim

VOCABULARIES, SCHEMAS, ONTOLOGIES

Room Polymnia/Erato/Kalia/Melpo | Thursday 29th | 14:00 - 15:15

Session Chair: Martin Hepp

14:00

Object Property Matching utilizing the Overlap between Imported Ontologies

Benjamin Zapilko | Brigitte Mathiak

14:25

Towards Competency Question-driven Ontology Authoring

Yuan Ren | Artemis Parvizi | Chris Mellish | Jeff Z. Pan | Kees Van Deemter | Robert Stevens

14:50

Identifying change patterns of concept attributes in ontology evolution

Duy Dinh | Julio Cesar Dos Reis | Cedric Pruski | Marcos Da Silveira | Chantal Reynaud

BEST WORKSHOP PAPERS

Room Orpheas | Thursday 29th | 14:00 - 15:15

Session Chair: Harald Sack

01. Ontology Design Patterns: Adoption Challenges and Solutions
Karl Hammar
02. CROCUS: Cluster-based ontology data cleansing
Didier Cherix | Ricardo Usbeck | Andreas Both | Jens Lehmann
03. Entity-based Data Source Contextualization for Searching the Web of Data
Andreas Wagner | Peter Haase | Achim Rettinger
04. Adapting Sentiment Lexicons using Contextual Semantics for Twitter Sentiment Analysis
Hassan Saif | Yulan He | Mirim Fernandez | Harith Alani
05. RESTful or RESTless -- Current State of Today's Top Web APIs
Frederik Bülthoff | Maria Maleshkova
06. Ornithology Based on Linking Bird Observations with Weather Data
Mikko Koho | Eero Hyvönen | Aleksi Lehikoinen
07. Harvesting Ontology Authoring Data with Protégé
Markel Vigo | Caroline Jay | Robert Stevens

- 08. Survey of Semantic Media Annotation Tools for the Web:
Towards new Media Applications with Linked Media
Lyndon Nixon | Raphaël Troncy
- 09. First experiments in cultural alignment repair
Jérôme Euzenat
- 10. Emergency vehicle routing using Geolinked Open Data for the Municipality of Catania
Sergio Consoli | Aldo Gangemi | Andrea Giovanni Nuzzolese | Silvio Peroni |
Diego Reforgiato | Daria Spampinato
- 11. Amending RDF Entities with New Facts
Ziawasch Abedjan | Felix Naumann
- 12. Predicting the impact of central bank communications on financial market investors'
interest rate expectations
Andy Moniz | Franciska de Jong

LINKED OPEN DATA IV

Room Hermes/Apollon | Thursday 29th | 15:45 - 16:35

Session Chair: Elena Simperl

15:45

A Scalable Approach for Efficiently Generating Structured Dataset Topic Profiles

Besnik Fetahu | Stefan Dietze | Bernardo Pereira Nunes | Marco Antonio Casanova | Davide Taibi |
Wolfgang Nejdl

16:10

Facilitating Human Intervention in Coreference Resolution with Comparative Entity Summaries

Danyun Xu | Gong Cheng | Yuzhong Qu

IN-USE & INDUSTRIAL III

Room Polymnia/Erato/Kalia/Melpo | Thursday 29th | 15:45 - 16:35

Session Chair: Evelyne Viegas

15:45

"Semantics Inside!" But let's not tell the Data Miners: Intelligent Support for Data Mining
Jörg-Uwe Kietz | Floarea Serban | Simon Fischer and Abraham Bernstein.

16:10

Matware: Constructing and Exploiting Domain Specific Warehouses by Aggregating Semantic
Yannis Tzitzikas | Nikos Minadakis | Yannis Marketakis | Pavlos Fafalios | Carlo Allocca | Michalis Mountantonakis | Ioanna Zidianaki.

WRAP-UP SESSION (WORKSHOPS, TUTORIALS, PHD SYMPOSIUM)

Room Orpheas | Thursday 29th | 15:45 - 16:35

15:45

Workshops and Tutorials Wrap-up

Session Chairs: Harald Sack | Nathalie Aussenac-Gilles

16:10

PhD Symposium Summary

Session Chairs: Steffen Staab | Mathieu d'Aquin

CLOSING AND AWARDS CEREMONY

Room Hermes/Apollon | Thursday 29th | 16:35

ESWC2014 Venues

**PRECONFERENCE
WORKSHOPS &
TUTORIALS
MAIN CONFERENCE**

ALDEMAR KNOSSOS ROYAL

Anissaras, Limenas Hersonissou
700 14, Heraklion, Crete, Greece
Tel: 0030 28970 27400

REGISTRATION DESK

The Venue features a registration desk for check in. Participants must check in prior to the conference. With check in all participants will receive the necessary documents & information for the conference. On site registration is possible.

Accepted methods of payment:

Cash, Credit Card

OPENING HOURS

Sunday	08:30 - 18:00
Monday	08:30 - 18:00
Tuesday.....	08:00 - 18:30
Wednesday	08:00 - 18:30
Thursday	08:00 - 18:00

Brought to you by:

STI · INTERNATIONAL

STI International is a global network carrying out research, education, innovation and commercialization activities on semantic technologies facilitating their deployment within industry and society at large.

STI International is organized as a collaborative association of interested scientific, industrial and governmental parties that share a common vision. STI International was kicked off in January 2007 in Berlin. STI International sets up its own research infrastructure and implements public and internal services that support the individual partner organizations in der research collaboration, standardization, dissemination and exploitation activities. STI International is active on an international level.

Neubaugasse 10/15 | A-1070 Vienna | p: +43 1 23 64 002-99 | e: office@sti2.org | w: www.sti2.org
